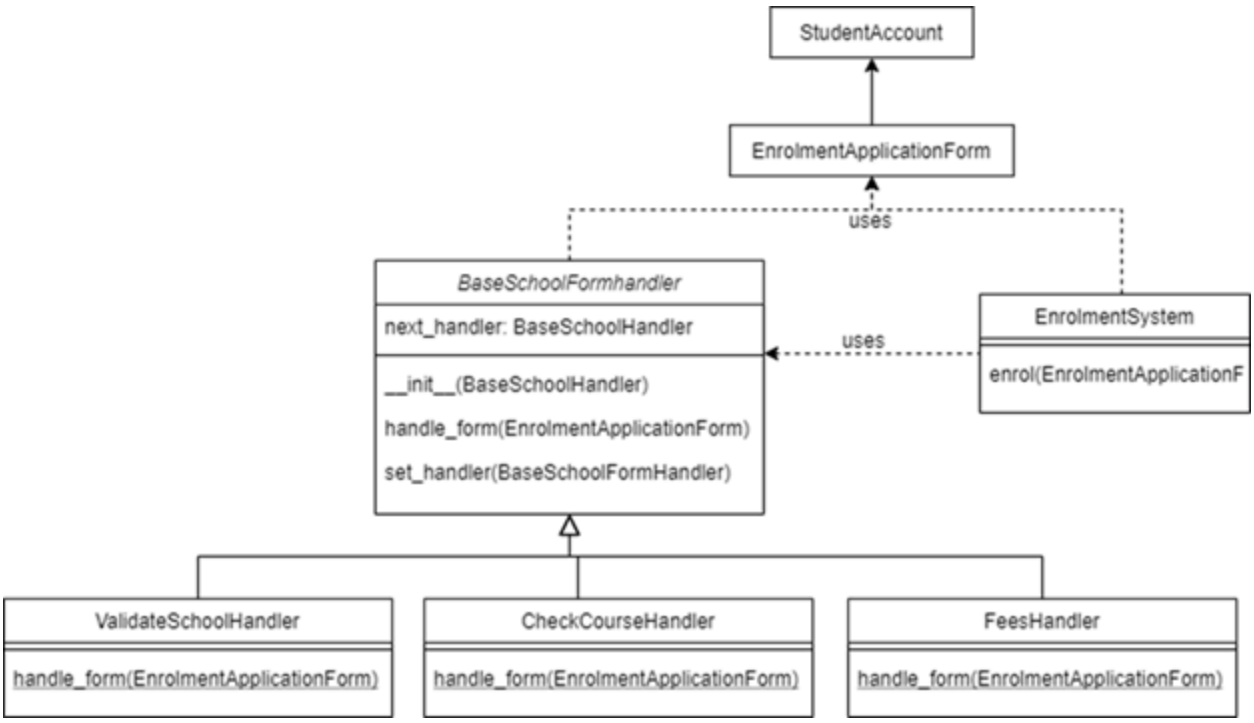
You successfully submitted your quiz.

Attempt Score	**6 / 7 - 85.71 %**
Overall Grade (Highest Attempt)	**6 / 7 - 85.71 %**

Question 1

Pick the design pattern that best matches the class diagram

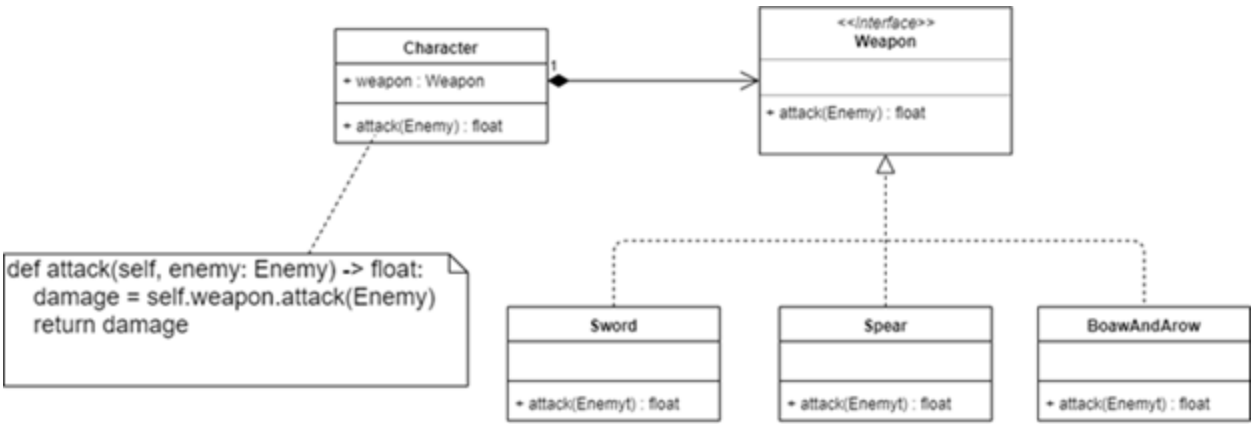


- ✓ (selected) Chain of responsibility
- State

- Strategy
- Singleton

Question 2

Pick the design pattern that best matches the class diagram



- Chain of Responsibility
- ✔ Strategy
- Factory
- State

Question 3

Each Handler in the Chain of Responsibility Pattern should execute an independent action/task

- ✔ True
- False

Question 4

Select the design pattern that encapsulates interchangeable behaviors and uses delegation to decide which one to use. In other words, this design patterns allows an

object to swap algorithms at runtime

- ✓ (selected) Strategy
- Singleton
- Chain of responsibility
- Observer

Question 5

Which of the following is a more advanced version of the Strategy pattern that allows a class to change almost of all of its behavior at run-time

- Chain of responsibility
- State
- Strategy
- ✗ (selected) Observer

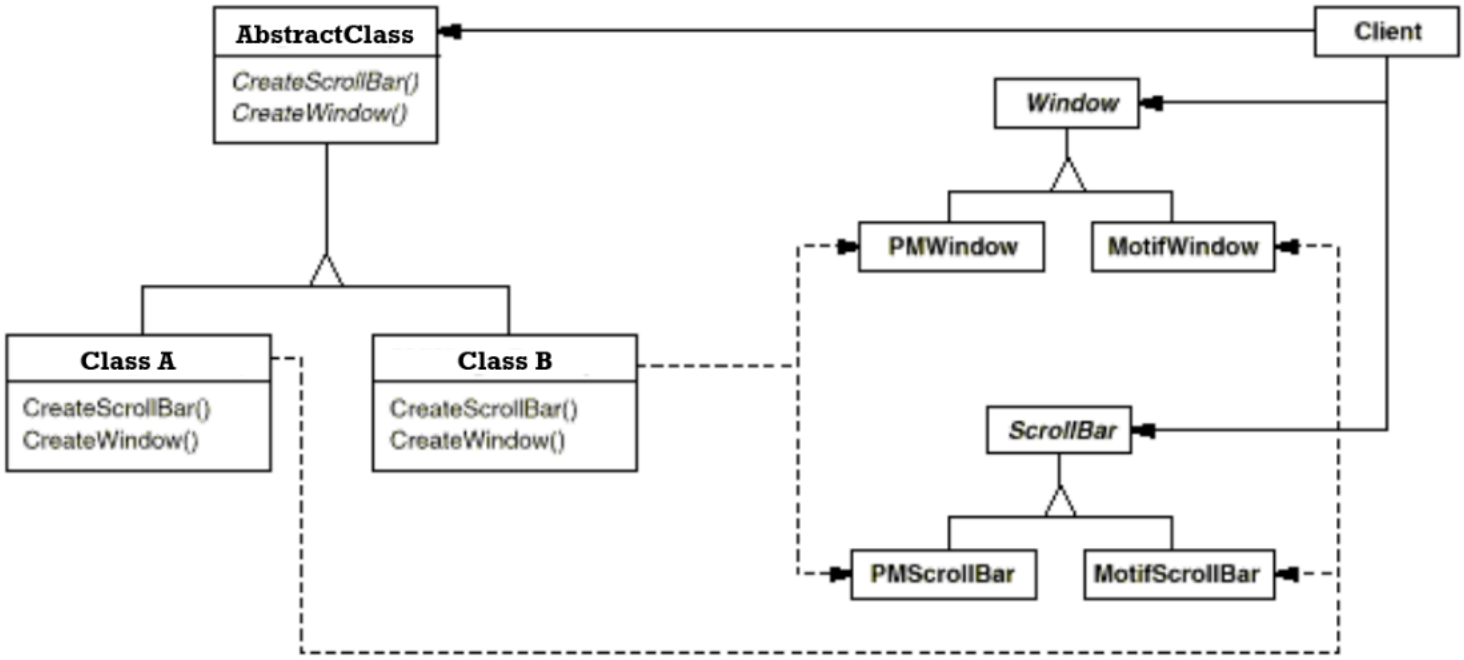
Question 6

Select all that are true about the Abstract Factory design pattern

- ✓ [x] It allows for the creation of a group of related objects
- ✓ [ ] It allows a single global object to have multiple behaviors
- ✓ [x] To create different variants of families of objects
- ✓ [x] It's a more evolved form of the Factory Pattern

Question 7

Pick the design pattern that best matches the class diagram



- ○ Singleton
- ✓ ◉ Abstract Factory
- ○ Facade
- ○ Observer
